1010-YELLOW-145	\$59.45	145"		
1010-YELLOW	\$0.41	per inch		

80/20 now stocks 1010 profiles in powder-coated safety yellow. The powder coat creates a precise, consistent color match. This is a great product to denote caution and warning and is used frequently in maintenance, facilities, and guarding applications.

All fasteners, panels and accessories that are 10-series compatible work with these safety-yellow profiles.

Please keep in mind that when requesting cuts or machining services, the machined area will be exposed, meaning not yellow. 80/20 can provide a machined bar that is still entirely safety-yellow; please allow for increased lead time.

^{80/20}**AutoQuoter** **XII**

AutoQuoter XII™ and Price List have been updated to include the new safety-yellow part numbers.

**These profiles are not FDA approved.
